Integrated collateral database

# Data Governance

# Integration friendly to unlock portfolio insights

Integration friendly

Infinite flexibility

## USP: Infinite Flexibility

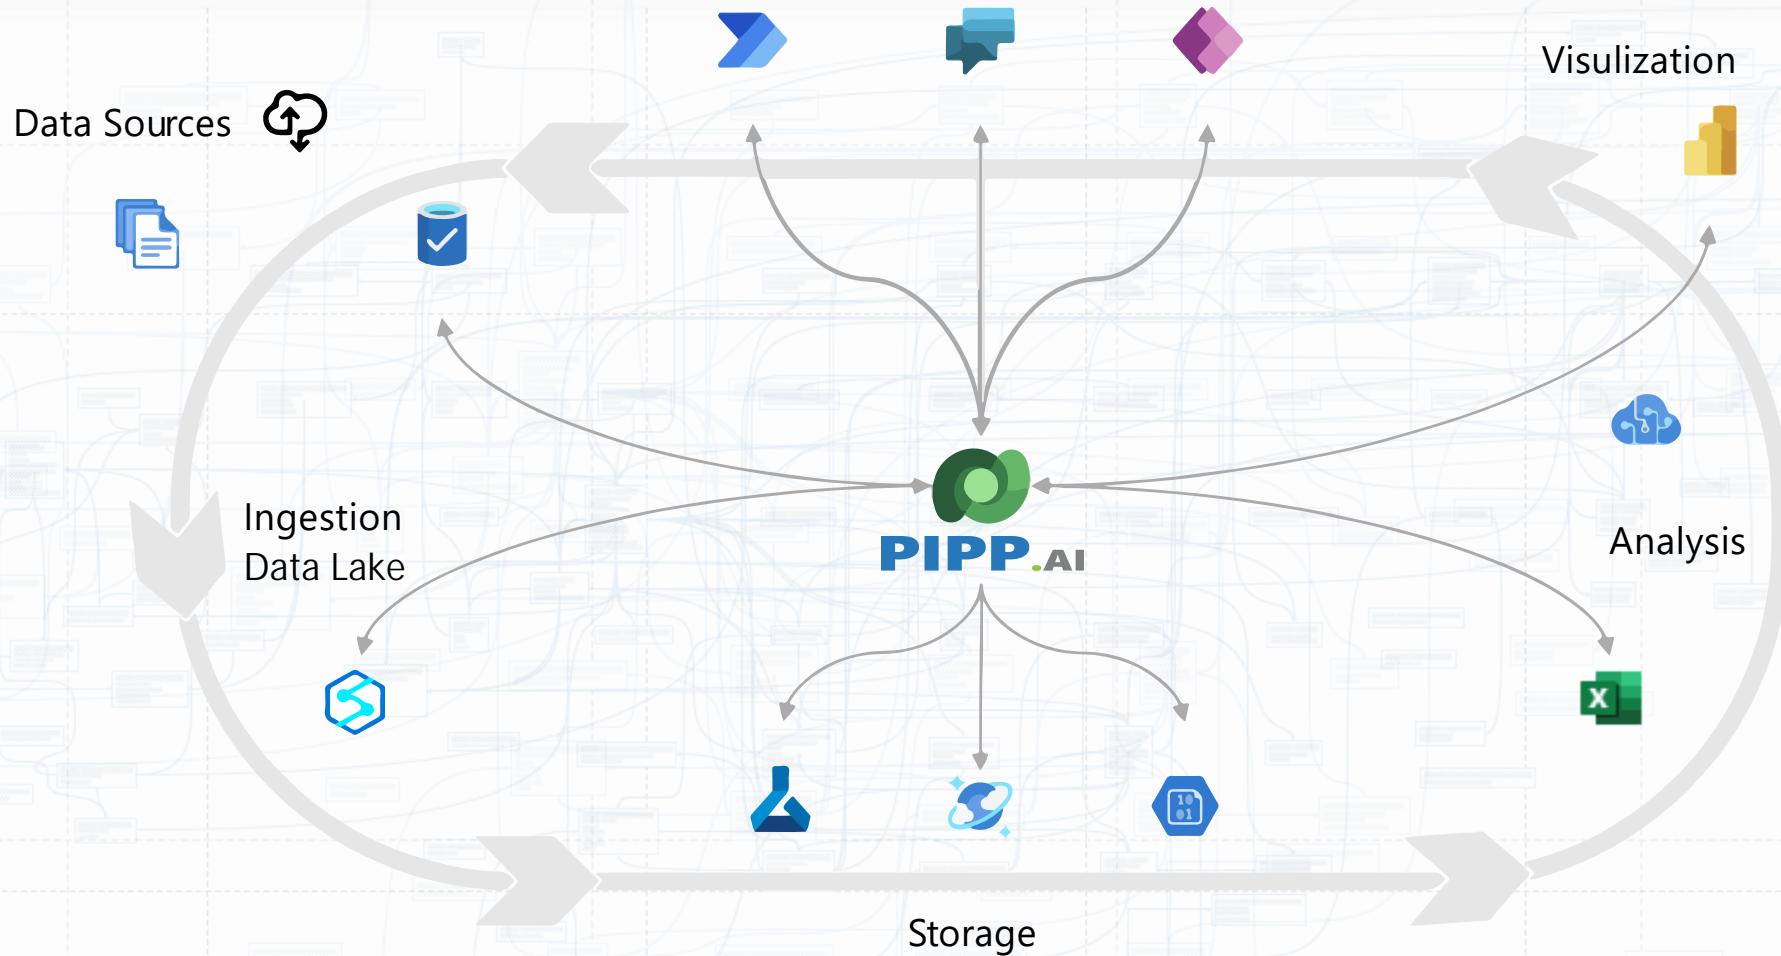

Rapid deployment and adoption

Curated CRE Dataverse to fast-track business insights, reporting , AI & ML

Unrestricted and economical customizations and integrations

Gives CRES ultimate control and access to their data across a portfolio

# PIPP.AI Architecture

Fastrack your single Dataverse (Global Unified Independent Data Layer) for;

Sustainability & ESG | Assets & Project Management | Maintenance & Facilities | Risk & Compliance | Leasing & Marketing | Approvals & Investments

Not SaaS

APaaS 

(Apps for a Platform as a Service)

Deploy App by App

Update and Innovate

Support & Customize

# Evolution of data management

## Spreadsheets

Value

Security

Customizability

Have thousands of spreadsheets scattered across various locations, with no security or governance. Spreadsheet don't talk to each other, and the initial creator left no guidance.

## Custom enterprise software

Value

Security

Customizability

Spent hundreds of millions of capital with software development teams which takes 5+ years and offers very little value as can't interoperate with other software

## SaaS – Software as a Service

Value

Security

Customizability

Have hundreds of “PropTech” SaaS tools all fighting to gain access to your data. Endless logins and security risks are created as you no longer have data access control or stewardship.

## APaaS – Apps for a Platform as a Service

Value

Security

Customizability

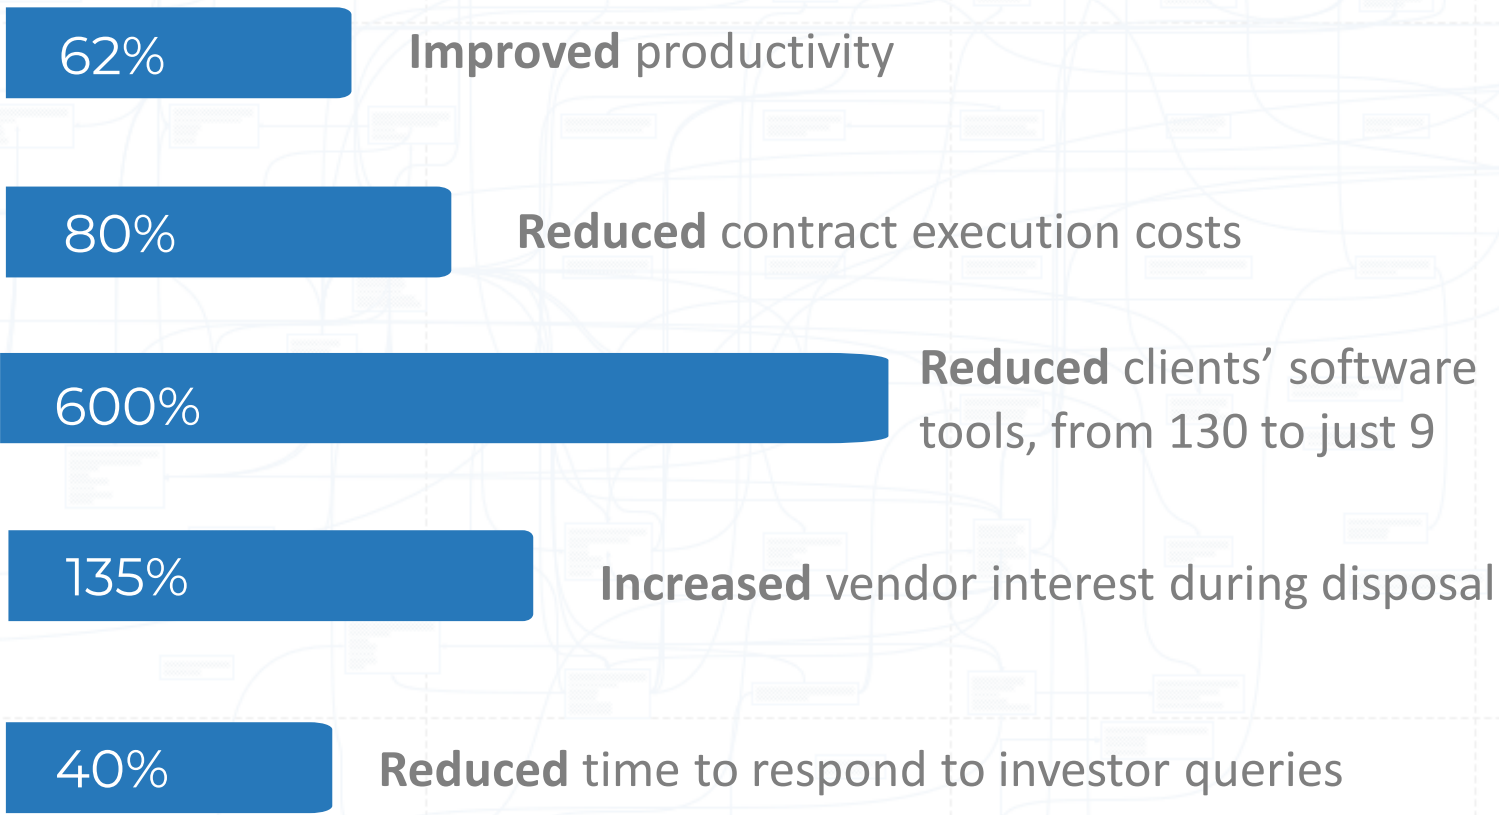

Created data democracy with a single Independent data layer on your platform of choice. Free to Build Apps yourself or buy ready made applications from integrated software vendors.

AVAILABLE ON  
Microsoft AppSource

# Customer Value

PIPP.AI

# Case Studies

Build the GBCA rating tool – Greenstar, which assesses the sustainability attributes of buildings and responds to the Paris Agreement, sustainability megatrends and supply chain opportunities.

Integrate asset management data as a pathway to improve sustainability tracking and forecasting across their entire portfolio.

Create a single source of truth to for a \$6.3b retail portfolio to improve operations and capital forecasting by leveraging PIPP.AI.

Continually improve the performance of Salta's entire portfolio from Capex planning to Maintenance contract execution and monitoring.

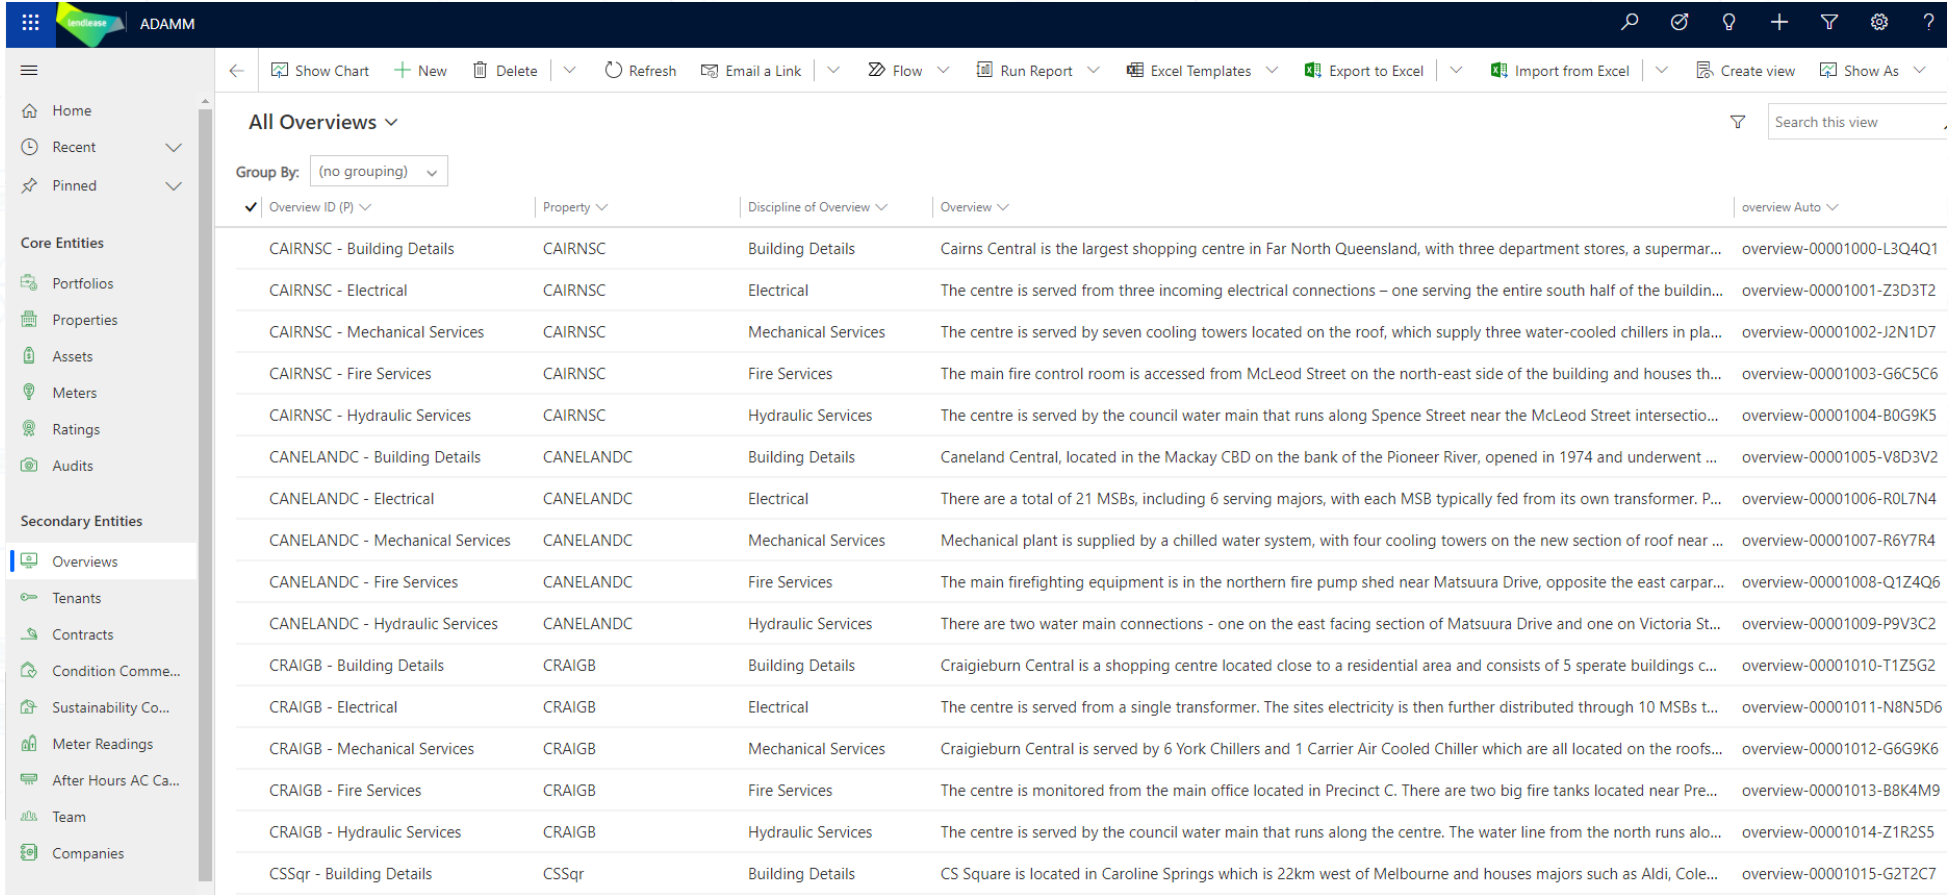

**Greenstar Online** solution was built by Build-Apps, which includes Movement & Place, Energy Use, Water Use, Lifecycle Impacts and Carbon Emissions calculators. This integrates with PIPP.AI sustainability app, SERGII, to expedite ESG reporting and drive progress towards net zero.

**Lendlease** deployed PIPP.AI to integrate their asset management data as a pathway to sustainability improvement. Using PIPP.AI's forecasting capabilities, 1,599 energy saving initiatives with an equivalent forecast saving of 24m kgs of CO2e were recommended.

**Stockland** deployed PIPP.AI to capture data from their 3-yearly asset and condition audits. This created richer portfolio insights to inform capital expenditure decisions.

**Salta** streamlined and centralised their asset operational data across their portfolio. By utilising PIPP.AI, Salta has full control and visibility of their property data – in addition to richer insights to drive improved maintenance, asset management and sustainability outcomes.

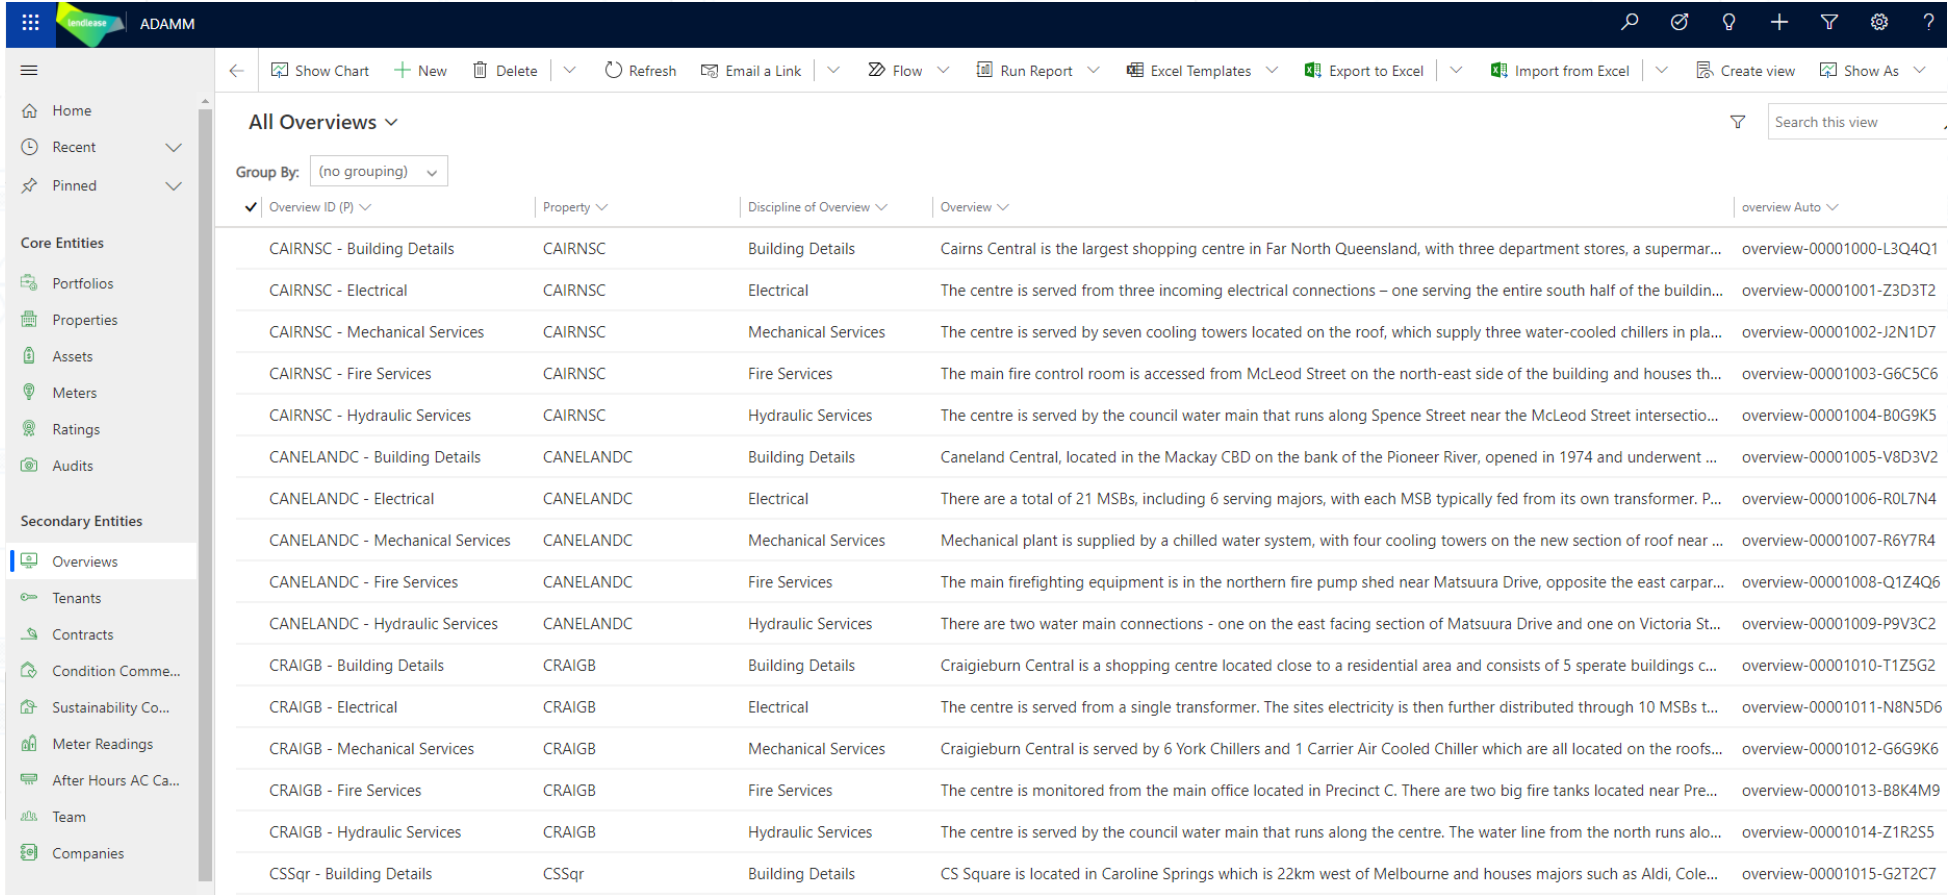

# Case Study - Lendlease

The screenshot displays the Lendlease ADAMM (Asset Data and Management) software interface. The left sidebar contains navigation options for Home, Recent, Pinned, and various entity types under 'Core Entities' (Portfolios, Properties, Assets, Meters, Ratings, Audits) and 'Secondary Entities' (Overviews, Tenants, Contracts, Condition Comments, Sustainability Comments, Meter Readings, After Hours AC Comments, Team, Companies). The main panel shows the 'All Overviews' view with a search bar and a table of building details.

Calculators

The GBCA has developed the following calculators in the rating tool.

- Upfront Carbon Emissions Calculator;
- Energy Use Calculator;
- Water Use Calculator;
- Life Cycle Impacts Calculator; and
- Movement and Place Calculator

The calculators are used to demonstrate compliance with their associated credits and the sustainability attributes of the building. Project teams targeting the Net Zero path must complete the Energy Use Calculator and either the Upfront Carbon Emissions calculator or the Life Cycle Impacts Calculator. [View Calculators](#)

# Meet the family

ADAMM

PAMM

SERGII

CHRISS

## ADAMM

### Asset Database for Audits and Monitoring Management

ADAMM is essential for assisting property professionals to manage assets and asset audits to optimize performance and develop strategic improvement plans based on real data.

## PAMM

### Project Administration Matrix Manager

PAMM is a repository for all projects undertaken across the property portfolio. Creates an easy to view snapshot of all the diverse, cross department projects and reports on CAPEX spend.

## SERGII

### Social, Environmental, Resilience, Governance Indices Improver

SERGII maintains data on how your business is tracking in terms of sustainability and takes care of all data relating to the social, environmental, resilience and governance (ESG) aspects.

## CHRISS

### Compliance Hazards, Risk, Inclusivity & Security Systemizer

CHRISS offers a proactive approach to risk management and risk mitigation. Creates an exchange with building occupants, prioritizing inclusivity, ensuring wide representation on OH&S matters.

# Meet the family

MATT

## MATT

### Maintenance Activity Task Tracker

MATT provides an up-to-date inventory on asset maintenance and collates an accurate record of the works and improvements carried out within a property portfolio.

ISLAA

## ISLAA

### Investments Surveys Leases Adjustments and Annuities

ISLAA provides an overview of the financial model and leases across a portfolio. It can be used by landlord or tenant and creates a clear place to track and understand the investment made and the potential returns.

MACC

## MACC

### Marketing and Advertising Collateral Collector

MACC loves to play with marketing and advertising information. From key facts and statements on individual properties to creating a curated and perfectly leasing portfolio image library.

CAMM

## CAMM

### Commissioning Activity Matrix Manager

CAMM provides a holistic management system for the commissioning of building services within a property portfolio. Ensures the client intent is maintained and allows password access to contractors.

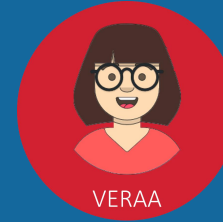

# Meet the family

REMI

LARAA

VERAA

OBIEE

## REMI

### Real-time Enterprise Metering with Integrated Intelligence

REMI enables real-time analysis of energy use per building across the entire property portfolio to develop and implement strategies to achieve energy and water targets.

## LARAA

### Legionella and Associated Risk Analysis Assessor

LARAA evaluates baseline risk profiles of Legionella according to a building's type, features and use patterns. Provides analysis of risk elimination measures including specific instructions and budget.

## VERAA

### Vertical Transport Entrapment and Risk Analysis Assessor

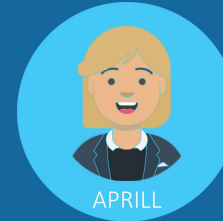

VERAA creates a single source of truth for all vertical transport systems in the portfolio. Incident reporting and lift KPIs can be uploaded to maintain a live analysis of all VT performance.

## OBIEE

### Other Building Information Enterprise Evaluator

OBIEE creates a comprehensive property investment database of all questions and issues arising around a building allowing analytics of potential investments, while collating data across industry to determine the quality of the space.

# Meet the family

## BARRIEE

**Building Annotation Real-time  
Recording and Interoperability  
Exchange Examiner**

BARRIEE translates languages for CFM, Digital Twins, BIM and BMS to ensure a record copy of information is kept centrally. Easy to understand dashboards give mapping and data transparency.

## SITAA

**Security of Information &  
Technology Analytical  
Assessor**

SITAA aims to crack down on cyber security managing endpoints and API integration to ensure data is the creation of a data democracy keeps ICT teams happy with the level of security auditing undertaken.

## APRILL

**Approvals, Procedures,  
Responses, Insights and  
Leverage Ledger**

APRILL is the C-Suites of a large portfolio's best friend. Creating sign off gates and approvals required for every development through Inception, Conversion, Delivery and into Operations.

## PERCIEE

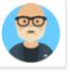

**Product Evaluator for  
Resource Costs Impacts  
and Embodied Carbon**

PERCIEE helps ensure both developments and operations are ethically and responsibly choosing the right products. His knowledge of EPDs and open data nature means he is continuously learning.

Overview Reviews Details + support

**ADAMM helps property professionals manage assets, audits and maintenance monitoring.**

ADAMM is the father of the Build-Apps ADAMM & Co suite of Apps, he holds the core data on your portfolio for which the wider ecosystem is able to utilize.

ADAMM create a CDS (Common Data Service) or as we call it the single source of truth to enable REITS and property portfolio owners to build structured data about your assets to enable Cases and Open forecasting.

ADAMM is essential for assisting property professionals manage assets, audits and maintenance monitoring, optimize performance, and develop strategic improvement plans based on real data.

ADAMM has been created as a Microsoft 365 Power App and can be accessed securely allowing review and edit function on any device with a internet connection. ADAMM is used to optimize asset performance, track maintenance, contractor performance, develop strategic improvement plans based on performance and benchmark and tag and share portfolio-wide asset history of real performance.

ADAMM is fully customizable to the clients working requirements and personal preferences. This includes the user interface and experience when viewing the database as well as the input fields. This allows ADAMM to effectively provide the most accurate and useful information for each client.

The structure and content of ADAMM can be hosted stand-alone on your 365 account, meaning complete open protocol and no lock-in contract. Furthermore we actively encourage you to build your own Power Apps to harness the power of the power platform.

Overview Reviews Details + support

**SERGII maintains data to track all ESG aspects of your business.**

SERGII is part of the Build-Apps ADAMM & Co suite and has been created as a Sustainability and Governance Microsoft 365 App for commercial real estate portfolio.

SERGII can be accessed securely allowing review and edit function on any device with internet connection. SERGII is the place to maintain up to date data on how your business is tracking in terms of sustainability. SERGII takes care of your business data relating to the social, environmental, resilience and governance. More and more REITS and asset owners are required to report to investors on the ESG performance of their portfolio. SERGII can consolidate responses to ESG tools such asGRESB, DJSI, WGBSC, CDP (BREAM, LEED, Green Star, etc.). Effectively SERGII can streamline all your ESG processes. In particular, we are working closely with WGBSC members to create a strategically aligned schema which references the UN SDGs. By aligning ADAMM's data with SERGII's inputs uncovers unparalleled insights to enable ESG improvement across the entire portfolio with clear alignment to the asset management strategy.

**PAMM is project management tool for commercial estate.**

PAMM is a Project Administration Matrix Manager for commercial real estate. The solution is a repository for all projects undertaken across a property portfolio. It creates an easy to view snapshot of all the diverse, cross department projects from project opportunity, to project initiation, planning, procurement and delivery. The project management matrix is asset centric and provides a framework to define scope, milestones, delivery plan, approvals, responsibility matrix and team. All procurement details are also managed within the solution from tender to contract and payment schedule. Within the delivery aspects the framework also allows for variation, health & safety, defects and correspondence data to be stored.

## Custom Apps

Let us know what you need; we are always looking for new family members to adopt if you have an idea!

We want to hear about it.

If you want to develop your own internal apps to talk to PIPP.AI that's also fine.

# Our Support and Update Model

## PIPP.AI. CDM Deployment

- Provide and T-con support to the IT team IT to assist with App setup.
- Provide CDM (common data model)
- Assist with 365 licensing and permissions
- Access to [SIAA \(Support and Invoicing Analytically Assistant\)](#)

## Per app Config - Power App, Power BI Analytics & Reports Config

- Deploy latest managed solutions to unlock CDM features
- Configure and maintain a Microsoft Team portal.
- Setup of several customized reports per property. These reports shall be Microsoft Excel based and use the live linked ADAMM content to ensure the report and graphing is accurate and relevant to asset managers requirements.
- Setup power BI that transforms PIPP.AI data into rich visuals allowing fast and accurate asset reporting.

S F T P S R M A L

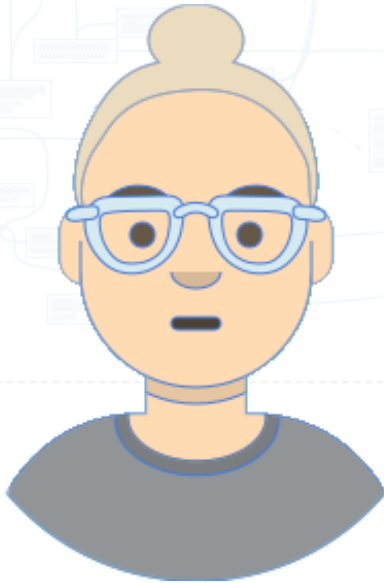

## Deployment

# Our Support and Update Model

# SIAA

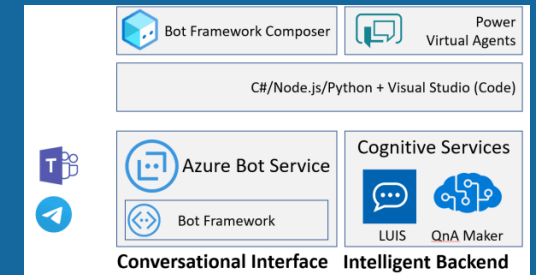

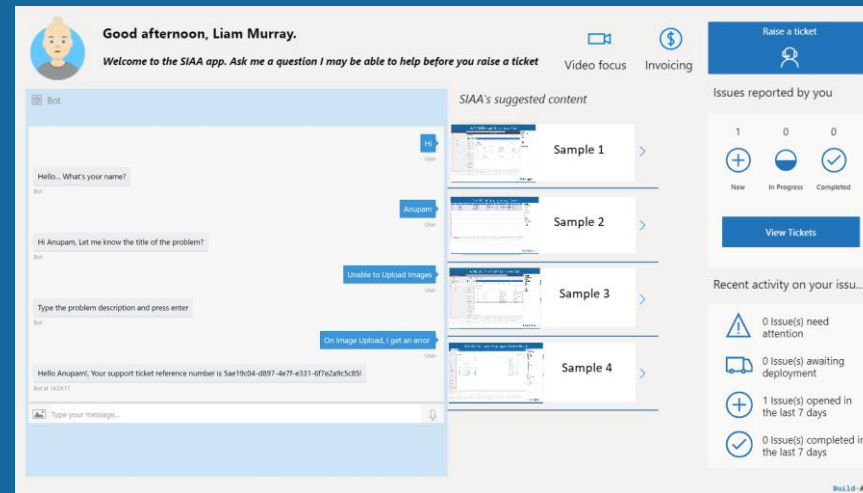

Support and Invoicing Analytical Assistant

SIAA is the matriarch of our app family but isn't your average grandmother. SIAA has the capability to provide unparalleled support and training by using an artificial intelligence algorithm based on Natural Language Processing (NLP).

The level of training & technical support by SIAA includes instructional videos, guides & technical support to log requests for bugs, maintenance issues & other technical problems.

SIAA enables forecasting of not only current app invoicing at app & property level, but also allows easy budgeting & forecasting for future applications without having to lift a finger.
